

It is Easy Being Green

Introducing the most Complete Line of
Green Certified Warewash Chemicals
in the NorthEast!

PERKINS
WAREWASH LAUNDRY TEAM

Simplifying Green and What it is!

Perkins promotes actual 3rd party certified products.

- Including Green Seal and DFE.
- Standards are set by each organization for specific categories – i.e. Housekeeping, floor care, hand soap, laundry detergents, and ware wash.
- DFE has the only certification program in place for ware wash products.
- Including dish machine detergent, drying agent, pot soaps, silverware presoak, floor cleaner, oven & grill and delimer among other categories.
- Green Seal does not recognize ware wash as a category, focus is on house keeping including glass cleaner, tub & tile, carpet care, degreasers and neutral floor cleaners among other products.
- Only a product which has been tested by an approved 3rd party agency (DFE and Green Seal are the two most recognized) can truly be green.

Certifying Agencies

- Two Most recognized in the US - Green Seal and DFE (Design for the environment).
- Green Seal operates under the international guidelines for environmental labeling programs, ISO 14020 and 14024, set by the International Organization for Standardization and is recognized by the EPA.
- DFE is a division of the EPA.
- Both organizations create standards with strict criteria for specific categories (ie Housekeeping, ware wash, floor care).
- All products are submitted to the organization to ensure that the products meet each criteria.
- All certified products will have the LOGO of Green Seal or DFE on the package.
- All certified products can be found on the organizations web site:

GOJO "FMX1"
Foaming Hand Soap
2x1250 ML – 516503

GOJO "TFX"
Foaming Hand Soap
2x1200 ML – 566502

Highly effective, environmentally preferred hand soaps that help support a clean environment and with environmentally responsible packaging and formulas. Products focused on human health and well-being through innovative and effective hand hygiene with reduced environmental impact. Biodegradable formulas are proven effective, yet mild enough for general hand-washing. Green certified products with rich, luxurious lather.

Claims by others can be misleading

- A product may meet one of many criteria needed to be certified GREEN but this does not make it a certified product - it must meet ALL standards set by a recognized 3rd party organization (ex. Reduced packaging is just one of many standards Green Seal uses to certify a product).
- In many of these instances the product is actually more harmful and has greater warnings than traditional products (read the MSDS carefully).
